

Beach House

BEACH HOUSE

The project evolved from the architect’s massing model and inspiration images. Working with the client and the architect, our engineering and manufacturing team developed refined casting methods to support the project. Each sightline and joint is deliberate with the depth of the Tactile Smooth Platen Cast Bronze Cladding™.

Beach House

Fire Back

FIRE BACK

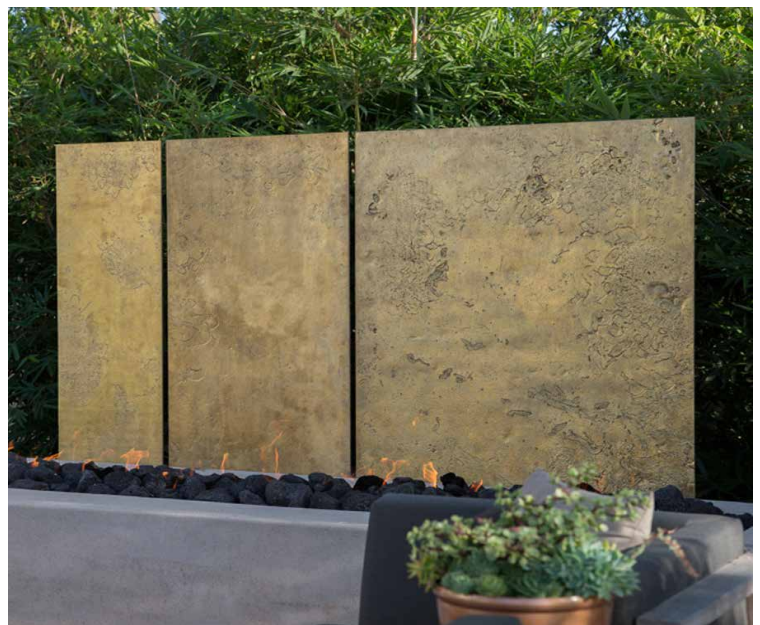

The landscape architect sought to create a warm and organic fireback that would create a sense of place. We created a Tactile Platen Cast Bronze™ series of panels each with their own character. The panels were anchored using concealed embeds for a seamless connection. We applied our clear coating which will allow the panels to slowly patina over time.

CV Starr East Asian Library

CV STARR EAST ASIAN LIBRARY

The CV Starr East Asian library at UC Berkeley features a rich palette of materials that beautifully frame the collection and serve to create an engaging, rich environment from research and exploration. The exterior is comprised of rainscreen stone cladding, bronze and copper cladding, glass window walls and cast bronze sunshades.
